PRESS RELEASE

THE AMERICAN COLLEGE OF RADIOLOGY RECOGNIZES MEDICAL IMAGING FOR EXCELLENCE

December 7, 2006 – Medical Imaging, a Kansas-City based radiology provider, has been awarded a three-year term of accreditation by the American College of Radiology for attaining the highest national standards in MRI and CT exams. Digital Mammography exams performed at the company's facilities have already been accredited.

“The American College of Radiology sets the standards for excellence,” says Michael Gordon, COO of Medical Imaging. “We now are acknowledged to be one of the very best places in the country for these exams.”

The ACR, headquartered in Reston, VA, awards accreditation to facilities for the achievement of the highest practice standards after a peer-review evaluation of the practice. These evaluations are conducted by board-certified physicians and medical physicists who are experts in the field. They assess the qualifications of the personnel and the adequacy of the facility equipment. Their website is located at www.acr.com.

Medical Imaging's website is www.medicalimagingkc.com; the company provides MRI, CT scan, Ultrasound, Mammography, X-Ray, and other radiological procedures at three state-of-the-art facilities around the Kansas City area. They are located at Rt. 152 and N. Oak Trafficway in the Northland, in the Eastland Center in Independence, and at Shawnee Mission Parkway and I-435 in Shawnee.
